

# AUDIOVOX [CDM-8600]

## Tri Mode Digital CDMA/AMPS Handheld Portable Telephone

In today's fast paced world, it has become a necessity to have access to real time information. Your communications tools must provide you with this access from anywhere at anytime. With that in mind, Audiovox developed the CDM-8600, a tri mode handset with web browsing and voice activated dialing features.

Operating on the 800 MHz AMPS/CDMA and 1900 MHz PCS frequencies, the CDM-8600 allows for seamless nationwide coverage as well as offering state-of-the-art, user-friendly features. Voice activated dialing and 2-way speakerphone are great for enhancing hands-free use of this phone. T9™ Text Input, vibrating alert and a 7-line LCD display make the CDM-8600 easier to use.

Several optional accessories are available for the CDM-8600, including: hands-free devices (installed, earphone microphone, cigarette lighter charger), charging devices (vehicle, travel, AC), data interface cables, and belt clips.

Your new CDM-8600 provides you with something only an Audiovox phone can: the proven reliability that has made us a leading wireless handset provider. Please take a few moments to read the following pages of the owner's manual. It will help you make the most efficient use of this valuable communications tool.

## Chapter 1

### BEFORE USING YOUR PHONE

Please read and fully understand this manual before using your phone.

This chapter addresses your phone, its keys and display icons, and covers the charging and proper use of the battery.

- Package Contents
- Handset Description
- Function Keys
- Display Indicators
- Using the Battery
- Charging the Battery
- Battery Information

## PACKAGE CONTENTS

Thank you for purchasing the CDM-8600 wireless handset. The phone's giftbox contains all of the items listed below.

Handset

User Manual

Hand strap

Standard Battery

Travel Charger

**NOTE:** Immediately Report any product defects to the place of purchase.

## HANDSET DESCRIPTION

This phone is a tri mode (800 AMPS / 800 CDMA / 1900 MHz PCS) CDMA digital phone with data and web browsing capabilities. The CDM8600 weighs 3.2 ounces and the dimensions are 3.3" x 1.6" x 9".

## FUNCTION KEYS

**END KEY:** Press to turn the handset on or off. Terminates a call or exits the current menu.

**SEND KEY:** Press to make or receive a call.

**NAVIGATION KEY:**

**IN IDLE MODE-**Press up to access the Phone Book, down to access the Messaging, right for Get It Now and left for Mobile Web.

**INSIDE THE MENU-**Within a menu, use to scroll through menu options, or to select a function displayed on the bottom line of the screen.

**SOFT KEYS:** Press to perform the functions displayed above them on the LCD Display.

**SPEAKER PHONE KEY:** Press to enable the speaker phone mode.

**CLEAR KEY:** Press to clear characters.

**LOCK KEY:** Press and hold it to enter the Lock mode.

**ETIQUETTE MODE KEY:** Press and hold it to enter the Etiquette mode. This mode disables the keypad tone and enables the vibrating alert.

## DISPLAY INDICATORS

### Signal Strength

Current signal strength. The more lines, the stronger the signal.

### Roaming

The phone is outside of its home area.

### Service Indicator

When a call is in progress,  is displayed. When  is displayed, the phone is in idle mode. When  is displayed, the phone is not receiving a signal from the system.

### Message

A text or voice mail message is waiting.

Text Message

Voice Message

Voice & Text Message

### Digital Mode

The phone is operating in digital mode.

### Battery

Battery charge level status. The more black lines the greater the charge.

### Mute

Phone is mute during a call.

### Scratch Pad

Stores a new phone number during a call without keypad tones.

Phone is in the progress of UP Browser.

### 1X

Phone is in the 1x service area.

## DISPLAY INDICATORS

### Emergency call

Blinks when an emergency call is in progress.

### Answering machine memo

New voice memos.

### Answering machine

Phone in answering machine mode.

### Etiquette

Phone is in etiquette mode.

### Schedule

Event or an alarm is set.

### Ring Mode

Ringer is set to ring mode.

### GPS Icon

911 Only

Location On

### Dormant

Indicates the phone is in disconnection condition while on "Server Connection".

### Data Only

Receive incoming call as an async call.

### Fax Only

Receive incoming call as a fax call.

## USING THE BATTERY

### INSTALLING THE BATTERY

1. Insert the bottom of battery into groove at bottom of the handset.
2. Press in the top of the battery until it clicks.

### REMOVING THE BATTERY

1. Push the tab with one hand and lift the top of the battery to separate.

**NOTE:** If the battery is not correctly placed in the battery compartment, the handset will not turn on and/or the battery may detach during use.

## CHARGING THE BATTERY

### POWER CONNECTION

Connect the charger to a standard 110V AC outlet.

**NOTE:**

1. It is more efficient to charge the battery with the handset off.
2. The battery must be connected to the phone in order to charge it.
3. Battery operating time gradually decreases over time.
4. If the battery fails to perform normally, you may need to replace the battery.

### CHARGING DISPLAY

" Charging ...."	Being Charged
" Charging is Complete"	Fully Charged
" Check Charger"	In Case of Error

## CHARGING THE BATTERY

### BATTERY CHARGING TIME

Battery Type	BTR- 8600 (900 mAh)
Charging Time	200 minutes

**NOTE:** Charging time applies only when your phone is turned off. Charging time may vary if your phone is turned on.

### BATTERY TALK & STANDBY TIMES

Status \ Type	PCS	CDMA	AMPS
Talk (min)	157	150	103
Standby (hrs)	113	103	25

**NOTE:** These times are for a new battery. Talk and standby time may decrease over time.

## **BATTERY INFORMATION**

Use only manufacturer approved batteries.

Never use a damaged or worn out battery.

Use the battery only for its intended purpose.

Never expose the battery terminals to any other metal object. This can short circuit the battery.

Avoid exposure to temperature extremes. A phone with a hot or cold battery may temporarily not work (or charge), even if the battery is fully charged. Always allow it to cool down or warm up first and keep the battery between 41°F and 95°F (5°C and 35°C).

When not in use, store the battery uncharged in a cool, dark, dry place.

The battery is a self-contained unit. Do not attempt to open its case.

Battery operating time gradually decreases. You may need to buy a new battery.

Never dispose of a battery in a fire!

Dispose of used batteries in accordance with local regulations.

Recycle!

## **Chapter 2**

### **BASIC OPERATION**

This chapter addresses the phone's basic functions including menus, volume levels, and call functions.

- Using the Phone
- Using the Menu
- Menu Summary
- Basic Functions
- Functions During a Call

## USING THE PHONE

### TURNING THE PHONE ON

1. Press .

● If "PASSWORD" appears, the phone is locked. To unlock, enter your 4-digit password.

**NOTE:** The default password is the last 4 digits of your phone number.

### TURNING THE PHONE OFF

1. Press and hold  until "Power Off" appears.

**NOTE:** 1. Immediately change or charge the battery if "LOW BATTERY WARNING POWER OFF" appears. If the power goes off, there is the possibility of damaging your phone's memory.  
2. If the battery is removed while the phone is on, information about the last call may be erased.

## USING THE MENU

### USING THE MENU

1. To enter the main menu from the standby screen, press .
2. Use the navigation key to view menu selections.
3. To go back to beginning screen or main screen, press .
4. To exit the menu, press .
5. To go into a submenu, press the corresponding number or select the desired item using the navigation key.
6.  and  can be used for scrolling through the menu.

## BASIC FUNCTIONS

### MAKING A CALL

1. Enter the phone number.

2. To place a call, press .

● **Retry by pressing** .

3. To end a call, press .

- To erase the last entered number, press .
- To erase all numbers and start again, press and hold .
- “CALL FAILED” will display if the call did not connect.
- If the line is busy, press .
- Selecting “AUTO RETRY” will automatically redial the number for the time you have selected. (Refer to page 90)

## BASIC FUNCTIONS

### PAUSE FEATURE

Pauses are used for automated systems (i.e., voice mail and calling cards). Insert a pause after a phone number, then enter another group of numbers. The second set of numbers is dialed automatically after the pause. This feature is useful for dialing into systems that require a code.

1. Enter the phone number, then press .

2. Select desired pause. A “P” will appear after the number to represent the pause.

#### STANDBY MENU

STO	FIND	PSE
-----	------	-----

#### PAUSE INPUT:

1 : HARD PAUSE  
2 : TIME PAUSE

#### DURING CALL MENU

1 : MESSAGING  
2 : MUTE  
3 : SCRATCHPAD  
4 : SEND MY PHONE #  
5 : MY PROFILE  
6 : VOICE PRIVACY  
7 : LOCATION

3. To dial, press . To store, press .

**HARD PAUSE:** *If you enter the hard pause character (P), the number entered after the hard pause character will be sent after the number is dialed.*

## BASIC FUNCTIONS

### SPEAKER PHONE

1. To activate speaker phone in idle, answering and calling modes, press .
2. After a call the phone automatically returns to normal (Speaker phone off).

*The phone resets to Speaker Phone Off when it turns off and back on.*

### ANSWERING CALLS

1. To answer a call, press any key except .
2. To end the call, press .

**NOTE:** *Calls can be automatically answered by activating the AUTO ANSWER function. (Refer to page 91)*

### CALLER ID

Identifies caller by displaying that person's phone number. If the caller's name and number are stored in your Phone Book, the name and number from the memory location are displayed.

**NOTE:** *The Caller ID numbers are saved in the call log. Caller ID is a system dependent feature. Please contact your service provider for details.*

## BASIC FUNCTIONS

### CALL WAITING

This function notifies you of an incoming call while you are on another call by sounding a beep tone.

1. When you hear the beep, press to answer the call.
2. To switch back to the first caller, press again.

**NOTE:** *Call Waiting is a system dependent feature. Please contact your service provider for details.*

### ANSWERING MACHINE DISPLAY

Notifies you of unchecked recorded memos in the answering machine.

1. Displays the number of stored memos that are recorded in the answering machine.

*To play the recorded voice memos, press .*

## BASIC FUNCTIONS

### ADJUSTING THE VOLUME

You can adjust the volume in two ways: by using the volume control keys on the side of the handset, or by using the menu.

Pressing volume control keys:

- During a call : adjusts earpiece volume.
- In Idle Mode : adjusts ringer volume.
- When the phone rings : adjusts ringer volume.

See page 70 for more detailed instructions.

### LOCK

Locks phone and prevents unauthorized use. Phone can only be used after inputting the password.

1. To lock the phone, press and hold .
2. To unlock the phone, input the password.

**NOTE:** *The default password is the last 4 digits of your phone number.*

## BASIC FUNCTIONS

### VIBRATE

Disables the ringer and vibrates when an incoming call is received. To enable this function:

1. Press     .
2. Select "VIBRATE".

### ETIQUETTE MODE

Silences all phone sounds while attending a meeting, a movie, or any other time you do not want your phone to be heard. All phone sounds include the ringer, key beeps and notifications. Your phone will vibrate to notify you of an incoming call. To enable this function, press and hold .

## FUNCTIONS DURING A CALL

### MESSAGING

1. Press **1** "MESSAGING".

### MUTE

Mutes the microphone while you are on a call so the other party cannot hear you if you speak.

1. Press **2** "MUTE".

**NOTE:** To turn mute off, press , then **2** "Mute" again.

### SCRATCHPAD

Stores a new phone number during a call without the calling party hearing the keypad tones.

1. While on a call, press **3** "SCRATCHPAD".
2. Enter a phone number, press then save the phone number in the phone book.

## FUNCTIONS DURING A CALL

### SEND MY PHONE #

Enables your phone number to be automatically transmitted to a pager. (Dependent on pager service.)

After calling a pager, when you are asked to enter your number, press **4** "SEND MY PHONE #".

### MY PROFILE

Enables you to review and edit your profile, entered through the Phone Book entry. (Refer to page 45 for more details.)

1. Press **5** "MY PROFILE".

### VOICE PRIVACY

Enhances voice privacy during a call.

1. Press **6** "VOICE PRIVACY".
2. Select "STANDARD" or "ENHANCED" with .

## **FUNCTIONS DURING A CALL**

### **LOCATION**

Enables your network to locate your current location through Global Positioning System (GPS).  
(Refer to page 88 for more details.)

1. Press   "LOCATION".

## **Chapter 3**

### **MEMORY & SETTINGS**

This chapter addresses numerous functions including saving phone numbers to the internal phone book, entering text and accessing call logs.

- Storing Phone Numbers
- Text Input Methods
- Speed Dialing
- Phone Book
- Recent Calls
- Messaging
- Get It Now
- Mobile Web
- Settings
- Tools
- Data Svc.
- Voice Svc.
- Emergency Calling

## STORING PHONE NUMBERS

The CDM-8600 memory stores up to 300 phone book list.

1. Enter phone #, then press .
2. Choose Add New Entry or Add Existing Entry.  
Press to select.
3. The Phone # will appear next to a list of icons.  
The name of the icon is displayed above the list.  
Use to choose the type of # you're adding,  
as indicated by the icon.  
Press to select.

**NOTE:** Press to display the Editor and enter a name.  
Follow instructions for entering text on page  
33. To change the input mode, press .  
Press to store the name.

4. Use to scroll through more options for the entry.
5. To store the entry, press "New entry is saved"  
will be displayed.

## TEXT INPUT METHODS

### ENTERING CHARACTERS

For convenient entry of memory location names and text messages, your phone offers several text input methods:

**Alpha mode** : Enter words by repeatedly tapping the corresponding key until the desired character is displayed.

**T9™ mode** : Tap each corresponding key only once and the phone predicts the word you are entering.

**Numeric mode** : Only enters numbers.

**Symbol mode** : Enters symbols like @, #, %.

### ALPHA MODE [ABC]

To choose Alpha mode, press then choose [ABC].  
The chart below outlines the key presses needed to display each letter or number.

Key Pad	1 Repetition	2 Repetitions	3 Repetitions	4 Repetitions	5 Repetitions
1	1	.	@	-	'
2ABC	A	B	C	2	...
3DEF	D	E	F	3	...
4GHI	G	H	I	4	...
:	:	:	:	:	:
9WXYZ	W	X	Y	Z	9

- The cursor automatically moves to the next space in two seconds after character input.
- To erase one letter, press .
- To erase the entire entry, press and hold .
- To switch between lowercase to uppercase letters, press .

## TEXT INPUT METHODS

### T9™ PREDICTIVE TEXT MODE [T9ABC]

To choose T9 mode, press  then choose [T9ABC]. This mode predicts the words you are entering using a built-in dictionary. Press only once for letter. The chart below outlines how to use T9™ text input.

KEY	FUNCTION
 Mode	Press to change text input mode: [T9Abc][Abc][123][Sym] Select [T9Abc] for predictive text input.
[0] Next	Press to view the next matching word if the underlined word is not the word you intended.
[#] Space	Press once to accept a word and add a space.
 Clear	Press once to delete the character to the left of the cursor.
 Left, Right	To move cursor.

## TEXT INPUT METHODS

1. Press each key once for each letter of the word you are writing.

● To write **John** with the English dictionary selected:

1. Press 5 once - (for - k)
2. Press 6 once - (for - km)
3. Press 4 once - (for - log)
4. Press 6 once - (for - john)

2. Press  until the correct word is displayed.

3. To select the correct word, press .

## TEXT INPUT METHODS

### NUMERIC MODE [123]

Numeric mode allows you to add a number to your entry/message. To select numeric mode, press  then select [123].

### SYMBOL MODE [SYM]

Symbol mode allows you to add various symbols to your entry. Whether you are adding an e-mail address to your Phone Book or sending an expressive message, symbols make these entries easier.

To choose symbol mode, press  then choose [SYM]. The symbols will appear on the display.

The corresponding key number for that symbol will appear as well. You can press the key to select the symbol or use the navigation key to highlight the symbol, then press .

To move to the next screen of symbols press .

## SPEED DIALING

### ONE-TOUCH/TWO-TOUCH DIALING

Ideal for frequently dialed numbers, this feature allows Phone Book entries to be dialed via the keypad with only one or two key presses. This feature is good for frequently dialed phone numbers.

#### ONE-TOUCH DIALING:

1-9 : Press and hold the corresponding memory number for more than 1 second.

#### TWO-TOUCH DIALING:

01-20 : Press the first digit and second digits of the memory number short and long respectively.

- If no phone number is stored in the location entered, "There is no number" will appear on the screen.
- If a phone number is stored in secret, you must enter the password to make a call.

**NOTE:** *One-touch dialing must be turned on in the handset. See page 44.*

## PHONE BOOK

### FIND

#### BY NAME

1. Press .
2. Enter a name or its character string then press to sort the phone book and display the names in alphabetical order.  
(Refer to page 33 about using of Alpha Editor)
3. All matched entries appear. Delete or view an entry by pressing or respectively.
4. To call the selected number, press .

#### BY NUMBER

Recall saved phone numbers by searching for the location number. Search results include the name and phone number saved to that location.

1. Press .
2. To search through the menu, enter a part of the phone number and press .
3. All matching entries will be displayed. Select an entry and either delete it by pressing or view it by pressing .
4. To call the selected number, press .

## PHONE BOOK

### BY GROUP

1. Press .
2. Select one of the options (Personal, Business, Etc, All) with the navigation key.
3. To retrieve the Phone book by group, press .
4. All the entries under the group will appear.  
You can either delete or view an entry by pressing or respectively when it is selected.
5. To call the selected number, press .

### ADD NEW ENTRY

1. To add a new entry to the phone book, press .
2. To enter a name, use the navigation key to move to a phone book field entry and enter the required information.
3. To save it press ; to return to the previous page, press .

## PHONE BOOK

### EDIT EXISTING ENTRY

1. To edit an existing entry, press .  
The 4 entry groups appear – Personal, Business, Etc., All.
2. Use to select one of the groups.
3. Select an entry under the group. To view or edit the entry press ; to delete the entry, press .

### EDIT GROUP

Adds, changes and deletes a group.

#### ADD NEW GROUP

1. To add a new group, press .  
A maximum of 7 groups is allowed.
2. Input a new group name.
3. To save press .

## PHONE BOOK

### CHANGE GROUP NAME

1. To change a group name, press .
2. Use to select an existing group name.  
The groups – Personal, Business, Etc., All – cannot be changed.
3. Input a new name.
4. To save it, press .

### CLEAR GROUP

1. To delete an existing group, press .
2. Use to select the group to be deleted.  
The groups – Personal, Business, Etc., All – cannot be deleted.
3. To delete it, press .
4. To reconfirm, press .

## PHONE BOOK

### EDIT SMS GROUP

Adds, changes and deletes a group.

#### ADD NEW GROUP

1. To add a new group, press .  
A maximum of 5 groups is allowed.

2. Input a new group name.

3. To save press .

#### CHANGE GROUP NAME

1. To change a group name, press .

2. The 3 existing groups appear - Family, Friends, Work.

3. Use to select an existing group name.

4. Input a new name.

5. To save it, press .

## PHONE BOOK

### EDIT EXISTING GROUP

1. To edit existing group, press .

2. The 3 existing groups appear - Family, Friends, Work.

3. Use to select an existing group.

4. Select an entry under the group.

5. To view or edit the entry press .

6. To delete the entry, press .

2. Select "LOCATION ON" or "911 ONLY" with .

- **911 Only** : Your location will be hidden from network & application except 911.
- **Location On** : Your location is now available to the network.

## SETTINGS

### OTHERS

#### ANSWER MODE

To select an Answer mode:

1. Press .
2. Select "ANY KEY" or "SEND KEY" with .

- **Any Key** - Press any key to answer an incoming call except , , and .
- **Send Key** - Press only to answer a call.

3. To save, press .

#### ACTIVE FLIP

To select Active Flip Answer mode:

1. Press .
2. Select "ON" or "OFF" with .
3. To save, press .

## SETTINGS

### AUTO RETRY

Automatically retries a call up to 5 times after a set time interval.

#### RETRY TIME

1. Press .
2. Select a time interval option (Off,3,5,7,10 seconds) with .
3. To save, press .

#### REPEAT

1. Press .
2. Select one of the options (1 time,3 times,5 times) with .
3. To save, press .

## SETTINGS

### AUTO ANSWER

Automatically answers a call after a preset number of rings. An ideal setting for the hands-free car kit.

1. Press .
2. Select one of the following items with :

● Off/5/10/18 seconds.

**NOTE:** This function will not be activated when you select Vibrate, Silent, or Ringer after Vibrate as a ringer mode.

3. To save, press .

### VOICE PRIVACY

Enhances voice privacy and avoids tapping during a call.

1. Press .
2. Select "STANDARD" or "ENHANCED", if available.

● "Enhanced" - Makes it more difficult to wire tap.

3. To save, press .

## SETTINGS

### LANGUAGE

To select the language in which letters are displayed on screen:

1. Press .

2. Select "ENGLISH" or "SPANISH".

3. To save, press .

### WEB IDLE TIME

Disconnects your phone from a network when there is no key input for a certain time period.

1. Press .

2. Use the navigation key to set the web idle timer or press digit keys one by one to enter the time.

● *Timer length cannot exceed 3 digits.*

3. To save, press .

## SETTINGS

### S/W VERSION

To display the version of your phone:

1. Press .

2. The version of the software and hardware appears.

### UP PROXY IP

To access your service provider's website, the phone can have up to 3 sets of the server IP (Internet Protocol) addresses and Port numbers. These may already be preset or be separately programmed by your service provider. Please note that any change to these settings may disable the Web access capability.

1. Press .

## TOOLS

### SCHEDULE

Reminds you of a previously scheduled event or anniversary with an alarm.

### EVENT

#### NEW EVENT

To insert new event:

1. To display the calendar, press .

2. Move the navigation key to choose a date in the calendar, then press .

- **Day to Day movement** : Move the navigation key left and right.
- **Week to Week movement** : Move the navigation key down and up.

3.1. To set a time for an event, press .

- **Choose one of the following in the first line (On time, 10 Min before, 30 Min before, 1 Hour before, No alarm)**
- **Change the date and time in the second line by moving to year, month, day, time input with the navigation key.**

3.2. To set a melody for the event, press .  
Choose one of the best melodies with .

3.3. To set a message for the event, press .

4. Press to save it or to return to the calendar.

5. "Save complete" appears. When you return to the calendar the day will be highlighted.

## TOOLS

### VIEW EVENT ENTRY

1. To view event entry, press .

### ALARM

1. To display up to three alarm entries, press .

2. Select one of the entries with .

3. To edit the existing alarm or set a new alarm, press .

To delete the existing one, press .

4.1. To set a time, press .

- **Use the navigation key to select an alarm frequency—Once, Daily, Weekly, Monthly, Yearly.**  
To save, press .

4.2. To set a melody, press .

Select one, then press .

4.3. To set a message, press .

4.4. To set a snooze, press .

Select one, then press .

**NOTE:** The snooze will not sound if the alarm is turned off within one minute. However, if the alarm does go off, the snooze will sound in one minute.

## TOOLS

### CALCULATOR

Allows you to use the CDM-8600 as a calculator to perform basic mathematic functions (addition, subtraction, multiplication, division).

1. Press then for "CALCULATOR".
2. Use the keypad to enter the numbers to be calculated.
3. Follow the instructions below to calculate  $(8*6)/4-2.5$ 
  - Input 8  
Move the navigation key left  
Input 6 and press the navigation key  
Move it right  
Input 4 and press the navigation key  
Move it down  
Input 2 and press the to input(.)  
Press 5, then .
4. To reset, press .

**NOTE:** Up to 10 integer digits and up to 2 decimals can be displayed. If the calculated result has more than 10 digits, the result is displayed in 10 digit logarithm.

## TOOLS

### WORLD CLOCK

Displays the time in a pre-programmed specific city.

1. Press then for "WORLD CLOCK".
2. Select a city with .
3. The world map appears with the city, its date and time. Select another city using the navigation key.

## TOOLS

### STOPWATCH

Allows you to use your phone as a stopwatch. The stopwatch displays time in hours, minutes, seconds, and 1/100 of a second.

1. Press (7) then (4) for "STOPWATCH".

2. To measure a time period.

- To start the stopwatch, press .
- To pause it, press .
- Press to resume it or to return to the previous page.

3. To measure more than one timed event:

- To start, press .
- To stop a time period and continue measuring another one, press .
- To stop the second and continue measuring a third one, press .
- Continue repeating the above to measure up to 6 time periods.
- Press to stop it and to view the results.
- Press or to return to the stopwatch.
- To reset it, press .

## DATA SVC.

### CONNECTION

To select a connection mode based on the handset usage:

1. Press (8) (1).

2. Select one of the following connection modes with .

- **Voice Call** : To receive a voice call.
- **Data Only** : To receive data when connected to PC.
- **Fax Only** : To function as a fax when connected to PC.

3. To save, press .

**NOTE:** This function is available only when the phone is connected to a data cable.

## DATA SVC.

### DATA SPEED

To select a connection speed based on the handset usage:

1. Press .

2. Select one of the following connection modes with .

- 19,200 BPS
- 115,200 BPS
- 230,400 BPS

3. To save, press .

**NOTE:** This function is available only when the phone is connected to a data cable.

## DATA SVC.

### TTY MODE

Your phone is able to operate with a TTY (Teletypewriter) device in both analog and digital modes. This feature is system dependent and may not be available in all areas.

#### CONNECTING TO TTY DEVICE

1. Turn the TTY device off.
2. Connect the TTY device to the phone at the earphone-microphone jack.

#### ACTIVATING/DEACTIVATING TTY MODE

1. Press .
2. Select "DISABLE" or "ENABLE" then press .  
When activated "TTY" will appear on the display.

#### MAKING AND ANSWERING A CALL

You can make or answer calls in the same manner as ordinary calls.

**NOTE:** A TTY (also known as TDD or Text Telephone) is a telecommunications device that allows people who are deaf or hard of hearing, or who have speech or language disabilities, to communicate by telephone. Connect the TTY device to the Headset Jack of PCS Phone. Then type the message you want to send on the TTY's keyboard.

## VOICE SVC.

### VOICE MEMO

1. To start VS menu, press  **9** 9 sec.
2. To enter the voice memo menu, press **1** 1 sec.
3. When you press **1** 1 sec to record a voice memo, instructions will appear and you will hear "Please record it at the tone".

*To view and play voice memos press **2** 2 sec.*  
*To erase all the voice memos press **3** 3 sec.*

4. To stop recording a memo, press **OK**.

**NOTE:** Press  to pause, then press **OK** to resume.

5. After recording a voice memo you can "REVIEW", "RE-RECORD" or "SAVE".

## VOICE SVC.

### CALL ANSWER

To set and operate the answering machine:

1. Press  **9** 9 sec.
2. Press **2** 2 sec.
3. Select one of the following options with , then press **OK**.

**ON/OFF:** Turns the Call Answer Mode on/off.

**INBOX:** Plays or erases a recorded memo.

**CALL SPEAKER ON (OFF) :** You can(not) hear the caller's voice being recorded by answering machine.

**WAIT TIME :** No ringer, 5s, 10s, 18s. Answering machine will answer the call after a specific time.

#### ICONS IN THE STORED MEMO LIST

☒ : Unchecked recorded memo in Answering machine.

☐ : A recorded memo in Answering machine that you have already checked.

#### NOTE:

##### RECORDING LIMITATION :

You have a limit of 10 voice memos including those in Answering Machine. Each voice memo has the time limit of 60 seconds.

## VOICE SVC.

### VOICE COMMAND

Trains the VR with the following categories of control words:

#### YES/NO

1. Press .
2. Press .
3. Select one of the following options with , then press .

**LIST WORDS** : Displays the list of control words in the Yes/No set. Select a control word from the list then press . Either train, untrain or view its status. To train a word, press and follow the voice prompts.

**TRAIN ALL** : Train Yes/No set to recognize your voice.

**UNTRAIN ALL** : Untrain Yes/No set not to recognize trained control words.

## VOICE SVC.

### WAKE-UP

Use the Wake-Up to train or untrain the VR with the control word, Wake-up.

1. Press .
2. Press .
3. Select one of the following options with , then press .

**LIST WORDS** : Displays the list of control words in the wake up set. Select a control word from the list then press . Either train, untrain or view its status. To train a word, press and follow the voice prompts.

**TRAIN ALL** : Train Wake-up set to recognize your voice.

**UNTRAIN ALL** : Untrain Wake-up set not to recognize trained control words.

## VOICE SVC.

### TOP LEVEL

Use the Top Level to train or untrain the VR with your control words. (Dial, Redial, Voice memo, Phone Book, Cancel).

1. Press  .
2. Press  .
3. Select one of the following options with , then press .

**LIST WORDS** : Displays the list of control words in the top level set. Select a control word from the list then press . Either train, untrain or view its status. To train a word, press  and follow the voice prompts.

**TRAIN ALL** : Train Top level set to recognize your voice.

**UNTRAIN ALL** : Untrain Top level set not to recognize trained control words.

## VOICE SVC.

### DIGIT DIAL

Use the Digit dial to train or untrain the VR with the control words (1 to 9, Zero, Oh, Verify, Clear, Call).

1. Press  .
2. Press  .
3. Select one of the following options with , then press .

**LIST WORDS 1,2** : Displays the list of control words in the digit dial set. Select a control word from the list then press . Either train, untrain or view its status. To train a word, press  and follow the voice prompts.

**TRAIN ALL** : Train Digit dial set to recognize your voice.

**UNTRAIN ALL** : Untrain Digit dial set not to recognize trained control words.

## VOICE SVC.

### VOICE DIAL

Lists, adds and erases voice tags for phone book entries:

#### LIST

1. Press **9** **MY**.
2. To list phone book entries with attached voice tags, press **4** **OK** **1** **OK**.
3. Select one with , then press **OK**.

**EDIT : Retrain / Voice Setting / Clear**  
**PLAY : Play voice tag.**

4. Press **OK** to play a voice tag or to edit an existing voice tag.
5. Select one of the following options, then press **OK**.

**1) Retrain: "Retrain Voice Name?" appears. Press **OK**, then say a name.**  
**2) Voice Setting: "Change?" appears. Press **OK**, select a phone number, then press **OK** again.**  
**3) Clear: "Removing Voice Names Proceed?" appears. Press **OK**.**

## VOICE SVC.

### ADD

1. Press **9** **MY**.
2. To add a voice tag to phone book entry, press **4** **OK** **2** **MY**.
3. Select one group with , then press **OK**.
4. Select a phone number with , then press **OK**.
5. To add a voice tag to the number, say the name.

### CLEAR ALL

1. Press **9** **MY**.
2. To erase all voice tags in the list, press **4** **OK** **3** **MY**.
3. "Removing all voice tags proceed?" appears.
4. Press **OK** and you will see a message.

**OK : Proceed to erase all the voice tags.**  
**CNCL : Return to the previous page.**

5. To clear all voice tags, press **OK**.

## VOICE SVC.

### VOICE ALERT

Sets the voice alert service.

#### ON/OFF

1. Press .
2. Press .
3. Select "ON" or "OFF" with , then press .

#### RECORD

1. Press .
2. Press .
3. Record voice alert.

#### PLAY

1. Press .
2. Press .
3. Confirm voice alert.

#### CLEAR

1. Press .
2. Press .
3. Select "YES" or "NO" with , then press .

## VOICE SVC.

### VOICE SETTING

Customizes the voice service menu.

#### UNTRAIN ALL

1. Press .
2. Press .
3. Select "YES" or "NO" with , then press .

#### PROMPT MODE

Use the prompt mode to select either beginner or expert mode. The expert mode consists of shorter texts and just beeps as opposed to the beginner mode that gives full instructions.

1. Press .
2. Press .
3. Select "BEGINNER" or "EXPERT" with .  
Press .

#### **<Beginner mode>**

**1<sup>st</sup> prompt :** "Main menu" followed by a short beep.

**2<sup>nd</sup> prompt :** "Speak a name to call, or say dial, redial, voice memo, Phone Book, or cancel", followed by a short beep.

#### **<Expert mode>**

**1<sup>st</sup> prompt :** A sequence of high and low tones.

**2<sup>nd</sup> prompt :** "Main menu".

**NOTE:** The VR times out and the phone returns to the standby mode after the 1st and 2nd prompts are heard, and nothing is said.

## VOICE SVC.

### DIGIT MODE

Use the digit mode to select one of the following options; ECHO, BEEP, ECHO+BEEP.

1. Press .
2. Press .
3. Select one option with , then press .

**ECHO:** *Digit echoes back when entered.*

**BEEP:** *Digit beeps when entered.*

**ECHO + BEEP:** *Digit echoes and beeps when entered.*

### HFK MODE

HFK stands for hand-free car kit. With this function, you can activate and utilize the VR feature when the phone is in the hands-free kit.

1. Press .
2. Press .
3. Select "OFF" or "ON" with , then press .

**NOTE:** *Once you say "Wake-up" and the phone recognizes your voice, you will hear a beep. The second time you say "Wake-up", your phone turns to VR mode.*

## VOICE SVC.

### SET ACTIVE

1. Press .
2. Press .
3. Select "SEND KEY" or "ACTIVE FLIP" with , then press .

## EMERGENCY CALLING

### E911 CALLING

Allows you to place emergency calls, even when the phone is locked. Emergency calls are placed on any available system.

1. Enter 911 and press .
2. The call will connect.

● *When a call ends, the phone remains to the Emergency Mode for 5 minutes.*

## Chapter 4

### INTERNET BROWSER

This chapter addresses using your handset to access the Wireless Internet.

- Start Internet Browser
- Browser Menu

## START INTERNET BROWSER

### WIRELESS INTERNET

Your CDM-8600 wireless handheld telephone allows you to browse various Internet websites directly from your phone. This provides access to up-to-date information such as news, sports, weather and stock quotes when you subscribe to Internet service with your service provider. Please contact your service provider for a list of available websites and service details.

1. To access wireless Internet network, press (5<sup>INTL</sup>) or press .

● *You can access the Internet from your phone when it is in digital mode, as indicated by the symbol on your phone's display.*

2. The Internet browser will launch.
3. Scroll the page using .
4. To select the options at the bottom of the display, press or .
5. To return to the previous page, press or (CLR).
6. To exit the Internet, press .

## BROWSER MENU

### BROWSER MENU

1. To enter the browser menu, press (Select ).

#### BACK

1. To return to previous page, press (1<sup>PREV</sup>).

#### HOME

1. To return home, press (2<sup>HOM</sup>).

#### EXIT

1. To exit browser, press (3<sup>EXIT</sup>).

#### MARK SITE

Adds a web page to bookmark list.

1. To select "MARK SITE", press (4<sup>MS</sup>).

#### BOOKMARKS

Displays Bookmark list.

1. To select "BOOKMARKS", press (5<sup>ML</sup>).

#### INBOX

Displays inbox list.

1. To select "INBOX", press (6<sup>INBOX</sup>).

## BROWSER MENU

### **RELOAD**

Reloads current page.

1. To select "RELOAD", press **(7 FWD)**.

### **SETTINGS**

Displays Browser Menu Settings.

1. To select "SETTINGS", press **(8 TYP)**.

### ● **HOMEPAGE**

Changes your homepage.

1. To select "HOMEPAGE", press **(1 L)**.

### ● **PROXY**

Enables you to select another "WAP PROXY".

1. To select "SET UP.LINK", press **(2 SEC)**.

### ● **CIRCUIT LINGER**

1. To select "CIRCUIT LINGER TIMER", press **(3 TYP)**.

### ● **SCROLL MODE**

1. To select "SCROLL MODE", press **(4 DIR)**.

### ● **SCROLL SPEED**

1. To select "SCROLL SPEED", press **(5 SEC)**.

## BROWSER MENU

### ● **KEY PRESS TIMEOUT**

1. To select "KEY PRESS TIMEOUT", press **(6 SEC)**.

### ● **SECURITY**

Displays Security Menu Options.

1. To select "SECURITY", press **(7 FWD)**.

### ● **ADVANCED**

Displays Advanced Menu options.

#### **-SHOW URL**

Displays the URL (Uniform Resource Locator) of the current page.

1. To select "SHOW URL", press **(1 L)**.

#### **-RESTART BROWSER**

Causes the deck history and deck cache to be cleared and starts a new session with the "UP. Link".

1. To select "RESTART BROWSER", press **(2 SEC)**.

## BROWSER MENU

### ABOUT...

Displays About Menu Options.

1. To select "ABOUT", press **9<sup>INFO</sup>**.

### ● OPENWAVE

When Openwave is selected from the browser menu, the browser version and copyright information are displayed. The device layer version is also displayed.

1. To select "OPENWAVE", press **1<sup>W</sup>**.

### ● SECURITY

Displays a list of security-related items.

1. To select "SECURITY", press **2<sup>SEC</sup>**.

*Selecting the encryption item from the browser menu displays a list of security-related items.*

## Chapter 5

### SAFETY INFORMATION

- Safety Information for Wireless Handheld Phones
- Safety Information for FCC RF Exposure
- SAR Information
- FDA Consumer Update

## SAFETY INFORMATION FOR WIRELESS HANDHELD PHONES

Read This Information Before Using Your Handheld  
Portable Cellular Telephone

### EXPOSURE TO RADIO FREQUENCY SIGNALS

Your wireless handheld portable telephone is a low power radio transmitter and receiver. When it is ON, it receives and also sends out radio frequency (RF) signals.

In August 1996, the Federal Communications Commissions (FCC) adopted RF exposure guidelines with safety levels for handheld wireless phones. Those guidelines are consistent with the safety standards previously set by both U.S. and international standards bodies:

ANSI C95.1 (1992) \*  
NCRP Report 88 (1986) \*  
ICNIRP (1996) \*

Those standards were based on comprehensive and periodic evaluations of the relevant scientific literature. For example, over 120 scientists, engineers, and physicians from universities, government health agencies, and industry reviewed the available body of research to develop the ANSI Standard (C951).

The design of your phone complies with the FCC guidelines (and those standards).

✱;

American National Standards Institute; National Council on Radiation Protection and Measurements; International Commission on Nonionizing Radiation Protection.

## SAFETY INFORMATION FOR WIRELESS HANDHELD PHONES

### ANTENNA CARE

Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications, or attachments could damage the phone and may violate FCC regulations.

### PHONE OPERATION

Normal Position: Hold the phone as you would any other telephone with the antenna pointed up and over your shoulder.

#### Tips on efficient operation:

- Extend your antenna fully.
- Do not touch the antenna unnecessarily when the phone is in use. Contact with the antenna affects call quality and may cause the phone to operate at a higher power level than otherwise needed.

### DRIVING SAFETY

Talking on the phone while driving is extremely dangerous and is illegal in some states. Remember, safety comes first. Check the laws and regulations on the use of phones in the areas where you drive. Always obey them.

Also, if using your phone while driving please:

- Give full attention to driving. Driving safely is your first responsibility.
- Use hands-free operation, if available.
- Pull off the road and park before making or answering a call, if driving conditions require.

## **SAFETY INFORMATION FOR WIRELESS HANDHELD PHONES**

---

### **ELECTRONIC DEVICES**

Most modern electronic equipment is shielded from RF energy. However, certain electronic equipment may not be shielded against the RF signals from your wireless phone.

#### **Pacemakers**

The Health Industry Manufacturers Association recommends that a minimum separation of six (6") inches be maintained between a handheld wireless phone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research by and recommendations of Wireless Technology Research.

If you have a pacemaker:

- ALWAYS keep the phone more than six inches from your pacemaker when the phone is turned on.
- Do not carry the phone in a breast pocket.
- Use the ear opposite the pacemaker to minimize the potential for interference.
- If you have any reason to suspect that interference is taking place, turn your phone OFF immediately.

#### **Hearing Aids**

Some digital wireless phones may interfere with some hearing aids. In the event of such interference, you may want to consult your service provider (or call the customer service line to discuss alternatives).

## **SAFETY INFORMATION FOR WIRELESS HANDHELD PHONES**

---

### **ELECTRONIC DEVICES**

#### **Other Medical Devices**

If you use any other personal medical device, consult the manufacturer of your device to determine if they are adequately shielded from external RF energy. Your physician may be able to assist you in obtaining this information.

Turn your phone OFF in healthcare facilities when any regulations posted in these areas instruct you to do so. Hospitals or healthcare facilities may be using equipment that could be sensitive to external RF energy.

#### **Vehicles**

RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles. Check with the manufacturer or its representative regarding your vehicle. You should also consult the manufacturer of any equipment that has been added to your vehicle.

An airbag inflates with great force. DO NOT place objects, including both installed or portable wireless equipment, in the area over the airbag or in the air bag deployment area. If in-vehicle wireless equipment is improperly installed and the air bag inflates, serious injury could result.

#### **Posted Facilities**

Turn your phone OFF where posted notices so require.

## **SAFETY INFORMATION FOR WIRELESS HANDHELD PHONES**

---

### **OTHER SAFETY GUIDELINES**

#### **Aircraft**

FCC Regulations prohibit using your phone while in the air. Switch OFF your phone before boarding an aircraft.

#### **Blasting Areas**

To avoid interfering with blasting operations, turn your phone OFF when in a "blasting area" or in areas posted: "Turn off two-way radio." Obey all signs and instructions.

#### **Potentially Explosive Atmospheres**

Turn your phone OFF when in any area with a potentially explosive atmosphere and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death.

Areas with a potentially explosive atmosphere are often, but not always, clearly marked. They include fueling areas such as gas stations; below deck on boats; fuel or chemical transfer or storage facilities; vehicles using liquefied petroleum gas (such as propane or butane); areas where the air contains chemicals or particles, such as grain, dust, or metal powders; and any other area where you would normally be advised to turn off your vehicle's engine.

## **SAFETY INFORMATION FOR WIRELESS HANDHELD PHONES**

---

### **PRECAUTIONS AND WARNINGS**

Please read and understand all of the Precautions and Warnings contained in this manual before attempting to operate your phone.

1. DO NOT use this equipment in an extreme environment where high temperature or high humidity exists, such as near a heater or in a closed car parked in the sun.
2. DO NOT abuse the equipment. Avoid striking, shaking or shocking. When not using the unit, lay down the unit to avoid possible damage due to instability.
3. DO NOT expose this equipment to liquids such as rain or spilled beverages.
4. DO NOT use unauthorized accessories. Use of unauthorized accessories may result in fire, electric shock or other bodily injury.
5. DO NOT disassemble the phone or its accessories. If service or repair is required, return the unit to an authorized AUDIOVOX service center. If unit is disassembled, the risk of electric shock or fire may result.
6. DO NOT short-circuit the battery terminals with metal items etc.
7. DO NOT use harsh chemicals, cleaning solvents or strong detergents to clean this phone. Always clean it with a soft, damp cloth.
8. DO NOT paint this phone. This can clog moving parts.

## SAFETY INFORMATION FOR WIRELESS HANDHELD PHONES

---

### OPERATING PROCEDURES

Never violate any of the following Rules and Regulations of the FCC when using your phone. The following offenses are punishable by fine, imprisonment, or both:

- Using obscene, indecent, or profane language.
- Using the unit to give off false distress calls.
- Wiretapping or otherwise intercepting a telephone call, unless that person has first obtained the consent of the parties participating in the call.
- Making anonymous calls to annoy, harass, or molest other people.
- Charging to an account without authorization to avoid payment for service.
- Refusing to yield a party line when informed that it is needed for an emergency call (It is also unlawful to take over a party line by stating falsely that it is needed for an emergency).

## SAFETY INFORMATION FOR FCC RF EXPOSURE

---

**WARNING!** Read this information before using your phone

### CAUTION

In August 1996, the Federal Communications Commission (FCC) of the United States with its action in Report and Order FCC 96-326 adopted an updated safety standard for human exposure to radio frequency electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies. The design of this phone complies with the FCC guidelines and these international standards.

Use only the supplied or an approved antenna. Unauthorized antennas, modifications, or attachments could impair call quality, damage the phone, or result in violation of FCC regulations.

Do not use the phone with a damaged antenna. If a damaged antenna comes into contact with the skin, a minor burn may result. Please contact your local dealer for replacement antenna.

### Body-worn Operation (Holster Part Number : 2H020885HOA)

This device was tested with holster (Part No:2H020885HOA) for body-worn operation with the back of the phone kept 0.59 inches (1.5cm) from the body. To comply with FCC RF exposure requirements, a minimum separation distance of 0.59 inches (1.5cm) must be maintained between the user's body and the back of the phone, including the antenna, whether extended or retracted. Other belt-clips, holsters and similar accessories not used by this device may not comply with FCC RF exposure limits and should be avoided.

*Note: For more information about RF exposure, please visit the FCC website at [www.fcc.gov](http://www.fcc.gov).*

## SAR INFORMATION

---

### **THIS MODEL PHONE MEETS THE GOVERNMENT'S REQUIREMENTS FOR EXPOSURE TO RADIO WAVES.**

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radiofrequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg.\* Tests for SAR are conducted with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government-adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. The highest SAR value for this model phone when tested for use at the ear is 1.23 W/kg and when worn on

## SAR INFORMATION

---

the body, as described in this user guide, is 0.659 W/kg. (Body-worn measurements differ among phone models, depending upon available accessories and FCC requirements). While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure.

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of <http://www.fcc.gov/oet/fccid> after searching on FCC ID PP4TX-55C.

Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications & Internet Association (CTIA) web-site at <http://phonefacts.net>.

\* In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

---

### **TRC-8600 FCC Compliance**

This is the information the travel charger "TRC-8600" about FCC Rules.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions; (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

**U.S. Food and Drug Administration -  
Center for Devices and Radiological Health  
Consumer Update on Mobile Phones**

### **1. Do wireless phones pose a health hazard?**

The available scientific evidence does not show that any health problems are associated with using wireless phones. There is no proof, however, that wireless phones are absolutely safe. Wireless phones emit low levels of radiofrequency energy (RF) in the microwave range while being used. They also emit very low levels of RF when in the stand-by mode. Whereas high levels of RF can produce health effects (by heating tissue), exposure to low level RF that does not produce heating effects causes no known adverse health effects. Many studies of low level RF exposures have not found any biological effects. Some studies have suggested that some biological effects may occur, but such findings have not been confirmed by additional research. In some cases, other researchers have had difficulty in reproducing those studies, or in determining the reasons for inconsistent results.

### **2. What is FDA's role concerning the safety of wireless phones?**

Under the law, FDA does not review the safety of radiation-emitting consumer products such as wireless phones before they can be sold, as it does with new drugs or medical devices. However, the agency has authority to take action if wireless phones are shown to emit radiofrequency energy (RF) at a level that is hazardous to the user. In such a case, FDA could require the manufacturers of wireless phones to notify users of the health hazard and to repair, replace or recall the phones so that the hazard no longer exists. Although the existing scientific data do not justify FDA regulatory actions, FDA has urged the wireless phone industry to take a number of steps, including the following:

- Support needed research into possible biological effects of RF of the type emitted by wireless phones;

- Design wireless phones in a way that minimizes any RF exposure to the user that is not necessary for device function; and
- Cooperate in providing users of wireless phones with the best possible information on possible effects of wireless phone use on human health.

FDA belongs to an interagency working group of the federal agencies that have responsibility for different aspects of RF safety to ensure coordinated efforts at the federal level. The following agencies belong to this working group:

- National Institute for Occupational Safety and Health
- Environmental Protection Agency
- Federal Communications Commission
- Occupational Safety and Health Administration
- National Telecommunications and Information Administration

The National Institutes of Health participates in some interagency working group activities, as well.

FDA shares regulatory responsibilities for wireless phones with the Federal Communications Commission (FCC). All phones that are sold in the United States must comply with FCC safety guidelines that limit RF exposure. FCC relies on FDA and other health agencies for safety questions about wireless phones.

FCC also regulates the base stations that the wireless phone networks rely upon. While these base stations operate at higher power than do the wireless phones themselves, the RF exposures that people get from these base stations are typically thousands of times lower than those they can get from wireless phones. Base stations are thus not the subject of the safety questions discussed in this document.

### **3. What kinds of phones are the subject of this update?**

The term "wireless phone" refers here to hand-held wireless phones with built-in antennas, often called "cell," "mobile," or "PCS" phones. These types of wireless phones can expose the user to measurable radiofrequency energy (RF) because of the short distance between the phone and the user's head. These RF exposures are limited by Federal Communications

Commission safety guidelines that were developed with the advice of FDA and other federal health and safety agencies. When the phone is located at greater distances from the user, the exposure to RF is drastically lower because a person's RF exposure decreases rapidly with increasing distance from the source. The so-called "cordless phones," which have a base unit connected to the telephone wiring in a house, typically operate at far lower power levels, and thus produce RF exposures far below the FCC safety limits.

#### **4. What are the results of the research done already?**

The research done thus far has produced conflicting results, and many studies have suffered from flaws in their research methods. Animal experiments investigating the effects of radiofrequency energy (RF) exposures characteristic of wireless phones have yielded conflicting results that often cannot be repeated in other laboratories. A few animal studies, however, have suggested that low levels of RF could accelerate the development of cancer in laboratory animals. However, many of the studies that showed increased tumor development used animals that had been genetically engineered or treated with cancer-causing chemicals so as to be pre-disposed to develop cancer in the absence of RF exposure. Other studies exposed the animals to RF for up to 22 hours per day. These conditions are not similar to the conditions under which people use wireless phones, so we don't know with certainty what the results of such studies mean for human health.

Three large epidemiology studies have been published since December 2000. Between them, the studies investigated any possible association between the use of wireless phones and primary brain cancer, glioma, meningioma, or acoustic neuroma, tumors of the brain or salivary gland, leukemia, or other cancers. None of the studies demonstrated the existence of any harmful health effects from wireless phone RF exposures. However, none of the studies can answer questions about long-term exposures, since the average period of phone use in these studies was around three years.

#### **5. What research is needed to decide whether RF exposure from wireless phones poses a health risk?**

A combination of laboratory studies and epidemiological studies of people actually using wireless phones would provide some of the data that are needed. Lifetime animal exposure studies could be completed in a few years. However, very large numbers of animals would be needed to provide reliable proof of a cancer promoting effect if one exists. Epidemiological studies can provide data that is directly applicable to human populations, but 10 or more years' follow-up may be needed to provide answers about some health effects, such as cancer. This is because the interval between the time of exposure to a cancer-causing agent and the time tumors develop - if they do - may be many, many years. The interpretation of epidemiological studies is hampered by difficulties in measuring actual RF exposure during day-to-day use of wireless phones. Many factors affect this measurement, such as the angle at which the phone is held, or which model of phone is used.

#### **6. What is FDA doing to find out more about the possible health effects of wireless phone RF?**

FDA is working with the U.S. National Toxicology Program and with groups of investigators around the world to ensure that high priority animal studies are conducted to address important questions about the effects of exposure to radiofrequency energy (RF).

FDA has been a leading participant in the World Health Organization International Electromagnetic Fields (EMF) Project since its inception in 1996. An influential result of this work has been the development of a detailed agenda of research needs that has driven the establishment of new research programs around the world. The Project has also helped develop a series of public information documents on EMF issues.

FDA and the Cellular Telecommunications & Internet Association (CTIA) have a formal Cooperative Research and Development Agreement (CRADA) to do research on wireless phone safety. FDA provides the scientific oversight, obtaining input from experts in government, industry, and academic organizations. CTIA-funded research is conducted through

contracts to independent investigators. The initial research will include both laboratory studies and studies of wireless phone users. The CRADA will also include a broad assessment of additional research needs in the context of the latest research developments around the world.

### **7. How can I find out how much radiofrequency energy exposure I can get by using my wireless phone?**

All phones sold in the United States must comply with Federal Communications Commission (FCC) guidelines that limit radiofrequency energy (RF) exposures. FCC established these guidelines in consultation with FDA and the other federal health and safety agencies. The FCC limit for RF exposure from wireless telephones is set at a Specific Absorption Rate (SAR) of 1.6 watts per kilogram (1.6 W/kg). The FCC limit is consistent with the safety standards developed by the Institute of Electrical and Electronic Engineering (IEEE) and the National Council on Radiation Protection and Measurement. The exposure limit takes into consideration the body's ability to remove heat from the tissues that absorb energy from the wireless phone and is set well below levels known to have effects.

Manufacturers of wireless phones must report the RF exposure level for each model of phone to the FCC. The FCC website (<http://www.fcc.gov/oet/rfsafety>) gives directions for locating the FCC identification number on your phone so you can find your phone's RF exposure level in the online listing.

### **8. What has FDA done to measure the radiofrequency energy coming from wireless phones ?**

The Institute of Electrical and Electronic Engineers (IEEE) is developing a technical standard for measuring the radiofrequency energy (RF) exposure from wireless phones and other wireless handsets with the participation and leadership of FDA scientists and engineers. The standard, "Recommended Practice for Determining the Spatial-Peak Specific Absorption Rate (SAR) in the Human Body Due to Wireless Communications Devices: Experimental Techniques," sets forth the first consistent test

methodology for measuring the rate at which RF is deposited in the heads of wireless phone users. The test method uses a tissue-simulating model of the human head. Standardized SAR test methodology is expected to greatly improve the consistency of measurements made at different laboratories on the same phone. SAR is the measurement of the amount of energy absorbed in tissue, either by the whole body or a small part of the body. It is measured in watts/kg (or milliwatts/g) of matter. This measurement is used to determine whether a wireless phone complies with safety guidelines.

### **9. What steps can I take to reduce my exposure to radiofrequency energy from my wireless phone?**

If there is a risk from these products—and at this point we do not know that there is—it is probably very small. But if you are concerned about avoiding even potential risks, you can take a few simple steps to minimize your exposure to radiofrequency energy (RF). Since time is a key factor in how much exposure a person receives, reducing the amount of time spent using a wireless phone will reduce RF exposure.

- If you must conduct extended conversations by wireless phone every day, you could place more distance between your body and the source of the RF, since the exposure level drops off dramatically with distance. For example, you could use a headset and carry the wireless phone away from your body or use a wireless phone connected to a remote antenna.

Again, the scientific data do not demonstrate that wireless phones are harmful. But if you are concerned about the RF exposure from these products, you can use measures like those described above to reduce your RF exposure from wireless phone use.

### **10. What about children using wireless phones?**

The scientific evidence does not show a danger to users of wireless phones, including children and teenagers. If you want to take steps to lower exposure to radiofrequency energy (RF), the measures described above would apply to children and teenagers using wireless phones. Reducing the time of wireless

phone use and increasing the distance between the user and the RF source will reduce RF exposure. Some groups sponsored by other national governments have advised that children be discouraged from using wireless phones at all. For example, the government in the United Kingdom distributed leaflets containing such a recommendation in December 2000. They noted that no evidence exists that using a wireless phone causes brain tumors or other ill effects. Their recommendation to limit wireless phone use by children was strictly precautionary; it was not based on scientific evidence that any health hazard exists.

### **11. What about wireless phone interference with medical equipment?**

Radiofrequency energy (RF) from wireless phones can interact with some electronic devices. For this reason, FDA helped develop a detailed test method to measure electromagnetic interference (EMI) of implanted cardiac pacemakers and defibrillators from wireless telephones. This test method is now part of a standard sponsored by the Association for the Advancement of Medical instrumentation (AAMI). The final draft, a joint effort by FDA, medical device manufacturers, and many other groups, was completed in late 2000. This standard will allow manufacturers to ensure that cardiac pacemakers and defibrillators are safe from wireless phone EMI.

FDA has tested hearing aids for interference from handheld wireless phones and helped develop a voluntary standard sponsored by the Institute of Electrical and Electronic Engineers (IEEE). This standard specifies test methods and performance requirements for hearing aids and wireless phones so that that no interference occurs when a person uses a "compatible" phone and a "compatible" hearing aid at the same time. This standard was approved by the IEEE in 2000.

FDA continues to monitor the use of wireless phones for possible interactions with other medical devices. Should harmful interference be found to occur, FDA will conduct testing to assess the interference and work to resolve the problem.

### **12. Where can I find additional information?**

For additional information, please refer to the following resources:

- FDA web page on wireless phones:  
(<http://www.fda.gov/cdrh/phones/index.html>)
- Federal Communications Commission (FCC) RF Safety Program: (<http://www.fcc.gov/oet/rfsafety>)
- International Commission on Non-Ionizing Radiation Protection:  
(<http://www.icnirp.de>)
- World Health Organization (WHO) International EMF Project:  
(<http://www.who.int/emf>)
- National Radiological Protection Board (UK):

## MEMO

# Chapter 6

## WARRANTY

- Protect Your Warranty
- 12 Month Limited Warranty

## PROTECT YOUR WARRANTY

Read your Warranty carefully, with the special consideration to paragraph seven of the Limited Warranty for your unit.

“Warranty does not apply to... or to any product or part thereof which has suffered through alteration... mishandling, misuse, neglect or accident”.

Many companies are making look alike accessories and in some cases, promoting that their product is equal to or better than the Audiovox product. Be careful. Some of these products may not be compatible to use with your Audiovox product and may damage the unit or cause it to malfunction. If service is required on your unit and it is determined that a non-Audiovox accessory has created the problem with your unit, the Warranty will not apply. In addition, if the unit has already suffered irreversible damage by reason of a non-compatible accessory, the Warranty will be voided. To protect your Warranty, use only compatible accessories which cannot damage or interfere with the functioning of your Audiovox product.

### AUDIOVOX COMMUNICATIONS CORP.

555 Wireless Blvd., Hauppauge, New York 11788, 800-229-1235  
16808 Marquardt Avenue, Cerritos, California 90703, 562-802-5100

### AUDIOVOX COMMUNICATIONS CANADA CO.

5155 Spectrum Way, Unit #5, Mississauga, Ontario  
Canada L4W 5A1, 800-465-9672

## 12 MONTH LIMITED WARRANTY

AUDIOVOX COMMUNICATIONS CORP. (the Company) warrants to the original retail purchaser of this Audiovox Handheld Portable Cellular Telephone, that should this product or any part thereof during normal consumer usage and conditions, be proven defective in material or workmanship that results in product failure within the first twelve (12) month period from the date of purchase, such defect(s) will be repaired or replaced (with new or rebuilt parts) at the Company's option, without charge for parts or labor directly related to the defect(s).

The antenna, keypad, display, rechargeable battery and battery charger, if included, are similarly warranted for twelve (12) months from date of purchase.

This Warranty extends only to consumers who purchase the product in the United States or Canada and it is not assignable or transferable.

This Warranty does not apply to:

- (a) Product subjected to abnormal use or conditions, accident, mishandling, neglect, unauthorized alteration, misuse, improper installation or repair or improper storage;
- (b) Product whose mechanical serial number or electronic serial number has been removed, altered or defaced.
- (c) Damage from exposure to moisture, humidity, excessive temperatures or extreme environmental conditions;
- (d) Damage resulting from connection to, or use of any accessory or other product not approved or authorized by the Company;

## 12 MONTH LIMITED WARRANTY

- (e) Defects in appearance, cosmetic, decorative or structural items such as framing and non-operative parts;
- (f) Product damaged from external causes such as fire, flooding, dirt, sand, weather conditions, battery leakage, blown fuse, theft or improper usage of any electrical source.

The Company disclaims liability for removal or reinstallation of the product, for geographic coverage, for inadequate signal reception by the antenna or for communications range or operation of the Cellular System as a whole.

To obtain repairs or replacement within the terms of this Warranty, the product should be delivered with proof of Warranty coverage (e.g. dated bill of sale), the consumer's return address, daytime phone number and/or fax number and complete description of the problem, transportation prepaid, to the Company at the address shown below or to the place or purchase for repair or replacement processing. In addition, for reference to an authorized Warranty station in your area, you can telephone in the United States (800) 229-1235, and in Canada (800) 465-9672 (in Ontario call 905-712-9299).

THE EXTENT OF THE COMPANY'S LIABILITY UNDER THIS WARRANTY IS LIMITED TO THE REPAIR OR REPLACEMENT PROVIDED ABOVE AND, IN NO EVENT, SHALL THE COMPANY'S LIABILITY EXCEED THE PURCHASE PRICE PAID BY PURCHASER FOR THE PRODUCT.

ANY IMPLIED WARRANTIES, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE SHALL BE LIMITED TO THE DURATION OF THIS WRITTEN WARRANTY. ANY ACTION FOR BREACH OF ANY WARRANTY MUST BE BROUGHT

## 12 MONTH LIMITED WARRANTY

WITHIN A PERIOD OF 18 MONTHS FROM DATE OF ORIGINAL PURCHASE. IN NO CASE SHALL THE COMPANY BE LIABLE FOR ANY SPECIAL CONSEQUENTIAL OR INCIDENTAL DAMAGES FOR BREACH OF THIS OR ANY OTHER WARRANTY, EXPRESS OR IMPLIED, WHATSOEVER. THE COMPANY SHALL NOT BE LIABLE FOR THE DELAY IN RENDERING SERVICE UNDER THIS WARRANTY OR LOSS OF USE DURING THE TIME THE PRODUCT IS BEING REPAIRED OR REPLACED.

No person or representative is authorized to assume for the Company any liability other than expressed herein in connection with the sale of this product.

Some states or provinces do not allow limitations on how long an implied warranty lasts or the exclusion or limitation of incidental or consequential damage, so the above limitation or exclusions may not apply to you. This Warranty gives you specific legal rights, and you may also have other rights which vary from state to state or province to province.
